# Professional Fall Prevention and Protection Training

Competent Person Training

16 Hours

This two-day intermediate level course is designed for facility and site supervisors who must also serve as the *competent person* required by OSHA 1926.32(f), 1926.500 and 1910 standards. Participants are assigned tasks which require evaluation for fall hazards. The tasks are described using real-life site photos. The training provides more detailed coverage of the Fall Prevention & Protection Supervisor Training course materials and the following program topics. The course also supplies the participant with the knowledge and skills to perform the annual inspection and record keeping.

## PROGRAM TOPICS

Maximum Class Size 25

- **Overview & Need for Fall Prevention and Protection**
- **Hazard Analysis**
  - Recognition of hazards
  - Evaluation criteria
  - Control measures

## Fall Protection Equipment Inspection Training

This advanced level course is designed for individuals responsible for inspecting personal fall arrest systems at the “competent person” level.

The training provides experience, methodology and an in-depth look at all

standards (ANSI & CSA) and regulations. (OSHA) covering inspection of personal fall arrest systems.

Maximum Class Size: 25

### Program Topics

- Competent Inspector Definition and Requirements
- Inspection Pass/Fail Criteria
  - American National Standards Institute (ANSI)
  - Occupational Safety and Health Administration (OSHA)
- In Depth Inspection Procedures
- Hands-On Practical Exercises

### Who Should Attend

All personnel required to inspect personal fall arrest systems at a “competent person” level or anyone required to perform the pre-use inspection such as a tool room worker.

### Course Materials

Reference materials including compilation of standards covering inspection, schematics of personal fall arrest systems, checklists, inspection program guidelines and certificate of compliance
